

Reliable technology. Practical delivery.

Consulting, infrastructure, cloud, security, sourcing, implementation, and support for public and private organizations.

Dunefox LLC | Available to support customers nationwide

CORE CAPABILITIES

Network & IT Infrastructure

LAN/WAN, Wi-Fi, network design, upgrades, implementation, and troubleshooting.

Cloud & Collaboration

Microsoft 365, Google Workspace, accounts, shared files, migration planning, and backup.

Cybersecurity & Identity

Access management, security planning, account structure, backup, and practical controls.

Video & Access Control

IP cameras, NVR and cloud video, access control, keyless entry, and system integration.

Technology Sourcing

Hardware, software, licensing, network equipment, maintenance, and manufacturer support renewals.

Professional & Managed Services

Assessments, planning, implementation, vendor coordination, documentation, and ongoing assistance.

DELIVERY APPROACH

Discover

Clarify the environment, users, priorities, locations, constraints, and desired outcome.

Design

Define technical scope, architecture, sourcing needs, and implementation dependencies.

Deliver

Coordinate agreed configuration, installation, integration, testing, and transition.

Support

Plan documentation, ownership, troubleshooting, renewals, and continued assistance.

ENGAGEMENT STRENGTHS

- Vendor-neutral planning based on requirements and lifecycle cost.
- Connected infrastructure, cloud, security, and sourcing capabilities.
- Defined scope, responsibilities, documentation, and handover.

ORGANIZATIONS SERVED

Federal, state, and local government; healthcare and human services; commercial organizations and growing businesses.

Discuss a project, procurement request, or support need.

info@dunefox.tech | (404) 585-1820 | dunefox.tech

Share the scope, locations, timeline, products or bill of materials, and procurement requirements. Proposals define the work and supporting documentation for each engagement.
